

Signature® Rust Proof Oil

Product Data Sheet

Description:

Signature® Rust Proof Oil is a non-staining rust preventive compound designed for long-term indoor corrosion protection of ferrous metals. It exhibits excellent water displacing characteristics and will rapidly separate water displaced from metal surfaces after machining operations or after alkali cleaning. The highly protective film is effective even under conditions of high humidity. The film deposited by Signature® Rust Proof Oil will protect ferrous parts for up to 12-18 months under good indoor storage conditions.

It can be applied by spray, dipping or by brush. Use as received, do not dilute with water or other chemicals. Do not rinse or remove Signature® Rust Proof Oil from surfaces until corrosion inhibition is no longer needed.

Caution: Contains petroleum distillate. Avoid contact with eyes and skin. Avoid prolonged breathing of vapors. Keep away from all sources of ignition. Flush from eyes or skin with water for 15 minutes. Get medical help if irritation persists. Keep out of the reach of children.

Typical Properties:

Color	Amber
Specific Gravity	0.82
Pounds Per Gallon	6.8
Odor	Mild solvent
Flash Point °F (TCC)	>160
Humidity Cabinet	60+ days
Film	Very light oil
Water Displacement	Pass
Stain Suppression	Pass

Product (s) manufactured in the USA.

Always confirm that the product selected is consistent with the original equipment manufacturer's recommendation for the equipment operating conditions and customer's maintenance practices.
